Feenics Rises to Platinum Partner Status with Mercury Security

Named top-tier technology provider for Authentic Mercury controllers

FOR IMMEDIATE RELEASE

Ottawa, Canada – January 17, 2017 – Feenics, Inc., Ottawa, Can., has achieved elite Platinum Partner Status for Mercury Security, Long Beach, Calif., indicative of the company's commitment to non-proprietary hardware cloud-computing environments. Authentic Mercury Security is one of the most widely used and specified access control hardware brands in the world.

Feenics is the originator of the award-winning Keep by Feenics™ Access Control as a Service (ACaaS) cloud-hosted security management solution (SMS). The partnership lends further credibility to Keep SMS and integration with Authentic Mercury hardware.

"We are very excited to welcome Feenics as a Platinum Partner for the Authentic Mercury platform," said Matt Barnette, President of Mercury Security. "The partnership has experienced phenomenal growth since its inception and validates the growing trend in the industry to open, cloud-based access control solutions."

Paul DiPeso, Executive Vice President of Feenics, said "achieving Platinum Partner status with Mercury is a validation of our strategy of teaming with the best field hardware provider in the industry in Mercury, while Feenics focuses solely on developing the most robust, cloud-based, access control solution, to meet the growing needs of the end-user market. The numbers don't lie with our rapid growth and we are fortunate to have a tremendous partner in Mercury. Their support has been second to none."

About Feenics*

Keep by Feenics™ is an industry-leading, true cloud-based access control and security management solution that can also be hosted on premise. Featuring two-factor authentication, TLS encryption and a rich, native UI, Keep utilizes Amazon Web Services' (AWS) load balancing and horizontal scaling to meet the needs of the enterprise client. In a hosted environment, Keep lowers the TCO by eliminating the need for servers or appliances, while providing piece of mind with full redundancy and disaster recovery. Keep's real-time event monitoring uses push notifications via email or SMS while integrating with leading providers of video, intrusion and wireless locks. The open RESTful API allows other applications to be seamlessly integrated to Keep. www.feenics.com

About Mercury Security
Mercury Security is the global leader in the supply of OEM access control hardware. Built on the Authentic Mercury open platform and with over three million panels sold, Mercury has the largest installed base and greatest accumulated run time of any access hardware provider in the world. Mercury Security is headquartered in Long Beach, California and has been providing enhanced access control technology to its valued partners since 1992. www.mercury-security.com
