Video Integration to Keep

VIDEO INTEGRATION OVERVIEW

Video management to Keep allows users to quickly respond to system events and alarms by launching pre-configured cameras.

BENEFITS

❖ Quickly associate alarm transactions with any video cameras that have been configured and linked to associated doors.

INTEGRATED VIDEO SOLUTIONS

❖ OpenEye OWS (no port forwarding)

❖ Salient Systems CompleteView

❖ Exacq – Exacqvision

❖ Milestone Systems XProtect

❖ Pelco VX and DS

FUNCTIONALITY

- Cameras – Imported from video servers, cameras can be tied to specific hardware devices and easily accessed upon alarm.

- Views – Create customized multi-camera layouts to link live or recorded views within the video player. Choose from 1x5, 2x2 or 3x3 grids from any associated VMS listed.

- Keep Video Player – A custom video player developed by Feenics is available to monitor live feeds and access stored video at the time of an alarm.

- Video Clips – Configure pre-alarm/post-alarm settings to determine length of clip.

- Acknowledge – Video alarms can have pre-determined acknowledgement requirements for the administrator.

- Attach image to alarm acknowledgement to assist with investigations.

- All alarm acknowledgements are stored in audit trail archives.
