## **FEENICS PRESS CONFERENCE AT ISC WEST**

### **ISC West 2018**

**Booth:** 24131

[www.feenics.com](http://www.feenics.com)

**Ottawa, Ontario (April 4, 2018)** – Feenics, a leading platform for Access Control as a Service (ACaaS) will be holding a press conference on **April 11th at 9am** Las Vegas time in the **ISC Events press room (Level 1 Room 503)** for several key announcements:

- The formal announcement of the Keep by Feenics™ v3 RESTful API achievement of VerAfied certification against security vulnerabilities, a first in our industry.
- The announcement of a new business approach for pricing of Cloud-based ACaaS platforms for enterprise applications, providing a more flexible and manageable alternative to how large systems are priced. (guess what, the price per door per month doesn't scale very well...)
- Overview of a recent Proof of Concept demonstrating the extreme horizontal scalability of a native Cloud-based platform for global customers.
- A short strategic overview of the benefits of Access-Control-as-a-Service, what it is (and what it isn't...) and why anybody should care....

### **About Feenics\***

Keep by [Feenics™](#) is the industry's most secure cloud-hosted, integrated access control and security management solutions. Featuring two-factor authentication, TLS encrypted field hardware and a secure SSL connection, Keep provides the end user with powerful features, using an easy to navigate user interface (UI) accessible via computer, tablet or smartphone. As a hosted platform, Keep reduces the total cost of ownership (TCO) by eliminating servers and appliances, while the UI is accessible anywhere there is an internet connection, providing peace of mind with full disaster recovery and redundancy. Keep's modular design scales from a single site to an enterprise environment.
